Re: Thompson Education Center – Well Drilling Plan  
P&P No. 13145.01

Dear Mr. McGoey:

In reference to the above project, enclosed please find the revised Well Drilling Plan set, as well as the revised and Restoration Bond Estimate. Revisions are based on a Workshop meeting held on Monday, July 18, 2016 at Town Hall. The following specific revisions have been made:

1. A third sheet (Sheet 2) has been provided, showing individual site plans at a 50 scale for each of the three (3) proposed wells. This includes location of access road, turnarounds and silt fence. These site plans also clearly display that our proposed well locations are well within the separation requirements to the 100 foot adjacent wetland area.
2. The cover sheet has been modified to 1" = 400'.
3. The bond has been revised to show \$250.00 per tree, and the contingency has been included in the total amount.
4. The access road detail has been modified to show existing grade, as opposed to subgrade, and any inferences to excavation within that existing grade has been removed.
5. General Note 6 has been provided on the plan stating "Prior to construction of the access road in 200' increments, 48 hours notice shall be provided to the Town for inspection of all stakeout work. Forty-eight (48) hours shall also be provided prior to all well drilling".
6. The access road removal notes have been modified to indicate "After well development **and Site Plan review** is complete..." to indicate **when** access road is to be removed.
